**Annual Conference 2012
of North Zone - AICC RCOG (UK)**

1st & 2nd September, 2012

Invitation

It gives us immense pleasure to announce and invite you to the Annual Conference 2012 of North Zone-AICC, RCOG. As always been in the past, this event will take place just before MRCOG Part I and II examinations at the same venue. Professor Wendy MN Reid- Vice President Education-RCOG UK will join us to provide updates on recent developments in RCOG exams, various training modules as well as on several clinical topics.

A great deal of remarkable ongoing research and several recent innovations in medical science (not only obstetrics and gynaecology but in other specialties too), have seriously challenged our traditional management on many aspects. This conference aims to focus on a group of specially selected topics which have made most significant impact on our current clinical practice. Our team of renowned expert faculty from UK and India would provide the latest views supported by strong evidence.

You are also invited to participate in any one of the three pre-conference workshops. Two of these are dedicated to common, but rather complex areas of our speciality – 'Perineal tear repair' and 'Fetal CTG'. Collecting our clinical data in a meaningful manner and publishing it in a proper format, despite a keen desire to do so, remains one of the weak areas for most of us. Our third workshop "Conducting & Publishing Clinical & Research Trials" is dedicated to this equally important area. All our faculty-well known for their teaching and clinical expertise, are committed to impart their knowledge and expertise to clear all your doubts.

We are sure, you would find this conference highly informative and thought provoking and it will be valuable to further enrich your expertise.

Please do check our website www.aicrcognzindia.com regularly for the latest updates on this conference as well as on other RCOG training courses.

We look forward to your active participation and welcoming you at this annual academic event.
